SUMMARY

Motivated B.Tech CS student and aspiring Data Scientist with proficiency in Python, SQL, and Django. Skilled in Machine Learning, NLP, Generative AI, Data Analysis, and REST APIs. Published researcher with hands-on internship experience and active leadership roles in NSS and GDG on Campus.

EDUCATION

Dr. J. J. Magdum College of Engineering

B.Tech – Computer Science and Engineering

Jaysingpur, Maharashtra

Aug 2023 – Nov 2027

KLE's Independent PU College, Nipani

Pre-University (PUC)

Nipani, Karnataka

Aug 2021 – Mar 2023

Shri Arihant Marathi Medium School

Secondary School (10th)

Borgaon

Mar 2021

TECHNICAL SKILLS

Languages: Python, SQL, SQL Queries, HTML **Frameworks & Libs:** Django, Streamlit, Pandas, NumPy, Matplotlib, Scikit-learn

Tools & Platforms: GitHub, Linux, Netlify, Google Gemini API, REST APIs

Concepts: Machine Learning, NLP, Generative AI, Exploratory Data Analysis, Data Visualization, Data Preprocessing, Data Cleaning, Precision & Recall Metrics, Cybersecurity, Cloud Computing

RESEARCH PUBLICATION

AI-Based Resume Analyzer for Skill Extraction and Job Role Prediction Using NLP

Snehal Sanjay Somane, Parth Rajkumar Thorwat | *IJPREMS*, Vol. 06, Issue 08, pp. 737–744, Aug 2026 | IF: 7.001 | DOI: 10.58257/IJPREMS54611

PROJECTS

AI Resume Analyzer | Python, Streamlit, Gemini AI, NLP

- ATS-based analyzer supporting 5+ file formats; applied data cleaning, data preprocessing, and exploratory data analysis on resume text with SQL queries for candidate data management – reducing manual review effort by 70%.
- Interactive dashboard with career roadmap recommendations for 100+ resume evaluations.

Smart Placement Portal | Python, Flask, MySQL, HTML, CSS, JavaScript, Pandas, Scikit-learn

- Web-based placement management system with role-based access for students, TPOs, and admins to manage profiles, drives, eligibility, and placement records.
- ML-based placement prediction module with data preprocessing, data cleaning, and SQL queries for automated eligibility checking; used data visualization dashboards to present insights.

Traffic Congestion Prediction System | Python, ML, Data Analysis

- ML system using exploratory data analysis, data preprocessing, and data cleaning on weather, time, and traffic features to classify congestion with 85%+ precision accuracy across 3+ categories. Applied data visualization to interpret model outputs.

Personal Portfolio Website | HTML, CSS, JavaScript, Netlify

- Responsive portfolio showcasing 3+ projects, deployed on Netlify with 100% uptime.

PROFESSIONAL EXPERIENCE

CodeAlpha Virtual Internship

Data Science Intern

Remote

Jul 2026 – Aug 2026

- Completed one-month Data Science internship (ID: CA/DF1/208588); recognized by Ministry of Corporate Affairs, Govt. of India. Demonstrated strong analytical skills and productivity.

Infosys Springboard 7.0

Virtual Intern

Remote

Jan 2025 – Dec 2025

- Completed industry-ready training in AI and software development under the prestigious Springboard 7.0 program.

AICTE Virtual Internship Program

Virtual Intern

Remote

Aug 2024 – Mar 2025

- Completed 3 tracks: Python Fullstack, Basic Android Development, and SQL & Database Management.

CERTIFICATIONS

Forage: Deloitte Cyber Job Simulation (Jul 2025), TATA Cybersecurity Analyst Simulation (Jul 2025) **Infosys:** Generative AI for All (Jun 2025), ChatGPT Gen AI Primer (Jul 2025)

Udemy: Python Zero to Hero, Linux for DevOps, Ultimate SQL Bootcamp (Jun 2025) **Simplilearn:** Ansible, AWS Cloud Adoption Framework (Jun 2025)

ACHIEVEMENTS & ACTIVITIES

NSS Vice President (Jan 2025–Dec 2026): Led 50+ volunteers in community outreach and social welfare drives. **GDG on Campus Member** (Jan 2025–Dec 2026): Tech talks, workshops, and coding sessions.

Training & Placement Club Member (Apr 2024–Present): Supporting placement drives and student-industry initiatives. **Media Club Member** (Jan 2025–Present): Photography, videography, and digital content creation.
